Technology Troubleshooting

What happens if the the TV doesn't turn on?

We have new (2019) Vizio TV's in the Bedroom and the Living Room. These are connected to Apple TV, which we find offers a superior experience to that provided by the smart TV.

In some very rare cases the system will become non-responsive and need to be reset.

You can do that by:

In the Living Room - Turning off the APC box next to the TV for about 10 seconds and turning it back on.

In the Bedroom - Turning off the small APC box behind the TV for about 10 seconds and turning it back on.
